

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

CAPITALATWORK FOYER UMBRELLA - Inflation At Work - Class C

(ISIN: LU0175696946) Inflation At Work (the 'Fund') is a Sub-Fund of CAPITALATWORK FOYER UMBRELLA (the 'Company'). Lemanik Asset Management S.A. is the Management Company (the 'Management Company') to the Fund.

Objectives and Investment Policy

- The Fund aims to deliver a positive return on your capital by investing primarily in inflation-linked bonds, most of which are issued by European and US entities. These bonds are listed on a stock exchange or traded on another regulated market. The Fund also invests a smaller portion of its assets in bonds from other issuers, as well as in cash and money market instruments.
- The Fund's investment strategy is based on analysing trends in and the outlook for the financial position of issuers, inflation, interest rates and the global economic picture. This analysis enables the Fund to assess the solvency of issuers whilst ensuring a balance among the ones it selects.
- The Fund may enter into futures or options contracts (derivatives) that are listed on the stock exchange or traded over the counter. The purpose of these derivatives is to both optimise portfolio management and to protect its value against an unfavourable change on the financial markets.
- This is an actively managed Fund without a benchmark. The manager can choose the composition of the portfolio but must adhere to the Fund's investment policy and objectives.
- This not a distribution unit class. All income from the Fund's investments is reinvested and incorporated into the value of your units.
- You may sell units from this class on any bank business day in Luxembourg.
- Recommendation: the Fund may not be suited to investors who wish to redeem within three to five years.

Risk and Reward Profile

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.
- This Fund is in category 3, since the share price has a moderate volatility and therefore the risk of loss as well as the expected reward is generally small to medium.

The following risks may not be fully captured by the risk and reward indicator:

- **Credit Risk:** The Fund can invest a material part of its assets in bonds. Their issuers can become insolvent, thus their bonds can either partly or entirely diminish in value.
- **Currency Risk:** As the Fund invests in securities denominated in

a number of different currencies, movements in exchange rates may, when not hedged, cause the value of the investments to increase or decrease.

- **Interest Risk:** Risk that interest rates rise and reduce the market value of an investment.
- **Market Risk:** The Fund's assets may decrease because of sovereign acts and political transformation, which may also influence free trade of currency. In addition, risks may arise because of restricted information possibilities in addition to less stringent supervision and control of certain markets. The performance of these markets may be subject to significant volatility.
- **Emerging Market Risk:** The risk that political or economic changes can arise from a period of instability within emerging markets. They can influence the value of investments.
- **Sustainability risk:** An environmental, social and governance event or situation, which, if it occurs, could have a material adverse impact on the value of the investment.

A complete description of risk factors is set out in the Prospectus in the section entitled 'Risk factors'.
