CAPITALATWORK FOYER UMBRELLA - ESG Bonds at Work - Class C

(ISIN: LU0974685322) ESG Bonds at Work (the 'Fund') is a Sub-Fund of CAPITALATWORK FOYER UMBRELLA (the 'Company'). Lemanik Asset Management S.A. is the Management Company (the 'Management Company') to the Fund.

Objectives and Investment Policy

- The Fund seeks to generate capital gains for investors by primarily investing in corporate, sovereign and supranational bonds without geographical limits and that are selected based on their financial attractiveness, as well as non-financial criteria that meet CapitalatWork's (CaW) socially responsible investment requirements (SRI). At least 50% of the bonds in which the sub fund invests have a financial rating: a minimum « Investment Grade ». The manager's investment strategy is primarily based on a responsible methodology that excludes controversial states, industries and companies, and compares companies based on environmental, social and governance (ESG) criteria. This methodology is regularly reviewed and can be consulted at the following address: https://www.capitalatwork.com/wp-content/themes/capitalatwork/documents/SRIM_SUSB_EN.pdf.
- Investments in sovereign bonds are characterised by issuers with a high-quality, democratic and fair system of governance and are restricted to OECD member countries. Issuers that have received substantial sanctions as defined by the United Nations and European Union will be excluded.
- The SRI eligibility conditions for issuing companies are based on the following framework:
 - Use of a share selection method using "Best in Class" criteria. The investments will be restricted to bonds issued by companies with an ESG risk rating considered to be above average, and that rank among the top 40% of their respective group of peers.
 - Evaluation of companies' participation in controversies and incidents across a range of ESG issues, on a scale of 1 to 5 (based on a global evaluation method).
- Investments restricted to bonds issued by a company deemed compliant with the 10 principles of the UN Global Compact).
- Participation is defined through two factors: the type of involvement in a given area (either direct or related involvement) and the level of investment, expressed as a percentage of annual income. In addition, pursuant to the sub-fund's SRI objectives, certain equities are excluded from the investment universe (partial or complete exclusion).
- No geographical restrictions apply to the Fund (with the exception of investments denominated in CNH). The common denominator linking these issuers is that they comply with CaW's exclusive SRI requirements. The Fund also uses techniques and instruments including listed derivatives, securities lending transactions and forward foreign exchange contracts to hedge specific risks and improve the profitability of the portfolio with a view to the effective management of its assets.
- This is an actively managed Fund without a benchmark. The manager can choose the composition of the portfolio but must adhere to the Fund's investment policy and objectives.
- This not a distribution unit class. All income from the Fund's investments is reinvested and incorporated into the value of your units.
- You may sell units from this class on any bank business day in Luxembourg.
- Recommendation: the Fund may not be suited to investors who wish to redeem within three years.

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower rewards Potentially higher rewards

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.
- This Fund is in category 3, since the share price has a moderate volatility and therefore the risk of loss as well as the expected reward is generally small to medium.

The following risks may not be fully captured by the risk and reward indicator:

- Credit Risk: The Fund can invest a material part of its assets in bonds. Their

issuers can become insolvent, thus their bonds can either partly or entirely diminish in value.

- Currency Risk: As the Fund invests in securities denominated in a number of different currencies, movements in exchange rates may, when not hedged, cause the value of the investments to increase or decrease.
- Interest Risk: Risk that interest rates rise and reduce the market value of an investment.
- Market Risk: The Fund's assets may decrease because of sovereign acts and political transformation, which may also influence free trade of currency. In addition, risks may arise because of restricted information possibilities in addition to less stringent supervision and control of certain markets. The performance of these markets may be subject to significant volatility.
- Sustainability risk: An environmental, social and governance event or situation, which, if it occurs, could have a material adverse impact on the value of the investment.

A complete description of risk factors is set out in the Prospectus in the section entitled 'Risk factors'.
